

STRUCTURE OF THE EARTH

1. Draw and label the structure of the Earth **in detail**. For full marks, use colour to differentiate the layers. (5 marks)

2. Describe what would happen if you dig straight down to the center of the Earth? Include depths, and how the temperature and pressure changes as you descend. (3 marks)

3. Is it probable that there could be a "Whole Other World" or "Lost World" underground at the center of the Earth? Why or why not? (2 marks)
